

Phase One Industrial and SimActive, Inc. Announce Integrated Software Solution

COPENHAGEN and MONTREAL April 22, 2015 –Phase One Industrial, a leading manufacturer and provider of medium format aerial and industrial digital photography equipment, and SimActive Inc., a world-leading developer of photogrammetry software have announced an integrated software solution for aerial photogrammetry projects.

SimActive's Correlator3D™ version 6.1 software can read and process both the GPS and IMU information directly from Phase One Industrial cameras' image files as well as system information such as the sensor pixel size and lens focal length. Since such metadata is carried with the images, there is no need for further processing of files.

“With our integrated solution, users can take images directly from the Phase One system and import them into Correlator3D™. With the GPS/IMU data automatically extracted from the metadata, users avoid having to import the information separately, ensuring the utmost efficiency and accuracy. We are proud to be a provider of such a unique solution for Phase One users,” said Philippe Simard, President of SimActive.

“We are pleased that a high-quality resource like SimActive's Correlator 3D™ is available for our customers; we are committed to providing flexible solutions to help our customers get results they can trust,” said Dov Kalinski, General Manager, Phase One Industrial.

About SimActive

SimActive is the developer of Correlator3D™ software, a patented end-to-end photogrammetry solution for the generation of high-quality geospatial data from satellite and aerial imagery, including UAVs. Correlator3D™ performs aerial triangulation (AT) and produces dense digital surface models (DSM), digital terrain models (DTM), orthomosaics and vectorized 3D features. Powered by GPU technology and multi-core CPUs, Correlator3D™ ensures matchless processing speed to support rapid production of large datasets. SimActive has been selling Correlator3D™ to leading mapping firms and government organizations around the world, offering cutting-edge photogrammetry software backed by exceptional customer support. About Phase One Industrial

Phase One Industrial is a division of Phase One A/S, and is dedicated to the research, development and manufacturing of specialized industrial camera systems and software. Phase One Industrial camera systems are built specifically for applications such as aerial photography, homeland security and inspection. The company provides advanced

hardware and imaging software solutions that meet the unique requirements of its customers worldwide. For more information, visit industrial.phaseone.com
